

Using the Web Extension with Secrets:

Web extensions will allow you to access your secrets directly from your browser. We will be focusing on the Google Chrome browser; however other browser extensions are available. Even though installation processes might be slightly different for each browser, the main process stays the same.

1. Logged in into your secret server page at <https://barryu.secretservercloud.com> using your Barry account credentials.
2. Click on a secret, then click on the **Launch** option.

3. The secret server will prompt you that a browser extension needs to be installed.

4. Click **OK**. This will redirect you a secret server page with links to the different browser extensions.
5. Click on the specific browser that you are using.

Installing Browser Extensions

To use the Web Password Filler, install one of the supported browser extensions as described below:

- Chrome: Install the extension by clicking the Web launcher icon in a Web Password secret, or by downloading it from the [Google Chrome](#) add-ons site. Also see [Managing Extensions in Your Enterprise](#) on securely managing Chrome extensions at scale.
- Edge Chromium: Install the extension by downloading it from the [Microsoft Edge](#) add-ons site.
- Firefox: Install the extension by clicking the Web launcher icon in a Web Password secret, or by downloading it from the [Firefox](#) add-ons site.
- Safari: Install the extension by downloading it from [How to install Safari extensions on your Mac](#). See the notes in the list below:

This will take you to the official Delinea Web Password filler extension for your browser. Here, you can review and read more information about this extension before you decide to use it.

6. Click on the **Add to Chrome** button and follow the prompts as needed. You will receive a notification that the extension was added.

Delinea Web Password Filler has been added to Chrome

Manage your extensions by clicking Extensions in the Window menu.

7. To use it. Click on the extensions menu icon at the top right corner on Google Chrome, then find the extension we just installed.

The screenshot shows the Google Chrome browser interface. The address bar contains 'kh'. The extensions menu icon (puzzle piece) is highlighted with a red box. The 'Extensions' panel is open, showing 'No access needed' and a list of installed extensions. The 'Delinea Web Password Filler' extension is visible in the list, with a mouse cursor hovering over it. A 'Remove from Chrome' button is visible in the bottom right corner of the browser window.

8. For the Password Filler extension to work, it will need to be connected to the secret server website: <https://barryu.secretservercloud.com> It may automatically populate on-screen. Click Next and Next again.

You have successfully added this extension. You can click on the **Launch** button again on the secret server page or on the extension itself and you will be logged into the website created on your secret.
