First Time Accessing the Site from a Device

From a computer

Run the **System Check** link prior to logging in when using a different device. Doing so will help you install the proper browser extensions for uninterrupted use.

On clicking the **System Check** link, you may be presented with a prompt to verify an application. Press "**Run**" and let the system check continue.

| | Name: | webNetwork File Services Uploader |
|---------------------------------------|------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| e e | Publisher: | Stoneware, Inc. |
| | Location: | https://apps.barry.edu |
| his application v | will run with unrestri | icted access which may put your computer and personal |
| his application v formation at ris | will run with unrestri sk. Run this applicat this again for apps | icted access which may put your computer and personal ion only if you trust the location and publisher above. |

Once completed, you should be prompted to restart the browser. On restart, all applications can now run.

| System Information | | | |
|-----------------------|------------------------------------------------------------------------------|--|--|
| User Agent: | Mozilla/5.0 (Windows NT 6.1; WOW64) AppleWebKit/537.36 (KHT Safari/537.36 | | |
| Operating System: | Windows 7 64Bit | | |
| Browser Type: | 1 Chrome | | |
| Screen Resolution: | 1280 × 1024 | | |
| Current Relay: | Relay03 | | |
| System Check | | | |
| Pop-up Blocker: | ✓ Popup Blocker Successfully Tested | | |
| Java Plug-in Version: | 🖌 Java Plug-in Detected | | |
| Java Test: | 🔿 Testing for Java | | |

Please resolve any issues identified in the System Check as needing updates such as updating Java or adjusting your Popup Blocker.

Log into <u>http://go.barry.edu</u> using your BarryNet username and your password. Your username is before the @ symbol in your e-mail address (<u>username@mymail.barry.edu</u>, <u>username@law.barry.edu</u>) or <u>username@barry.edu</u>).

From a mobile device

Using Go.Barry from a mobile device is best when utilizing the **webAgent** app available in your device's app store.

Apple

Apple users can go to the App Store and search "WEBAGENT". Select the Stoneware webAgent app and install it.

Once installed, open **webAgent**, accept the terms and click **Add Account** to begin the Go.Barry setup.

Enter the information so it reflects that which is shown below. Once complete, click Credentials and enter your Barry login information.

| ●●●○○ AT&T 🗢 10:40 AM | 9 88% 1 | ●●●●○ AT&T 穼 | 10:40 AM | o 88% e d |

Finally, press **Done**. When back at the account page, select the **Barry Apps** account to connect to **GoBarry**. You will be presented with the Go.Barry homepage and resources.

Android

Android users can go to the Play Store and search "**WEBAGENT**". Select the **Stoneware webAgent** app and install it.

Once the respective app is installed on the device, navigate to **webAgent** and add an account.

Update the settings so they reflect what is shown below. Make sure to press '**Credentials'** and enter your Barry login information.

| Description Barry | |
|----------------------------------------|---|
| Server apps.barry.edu | |
| Use SSL | |
| Credentials Set account credentials | |
| Auto connect | 1 |
| Retry | |
| Keep alive | |
| Disconnect on failure | |

Finally, press Save.

Open the **webAgent** app from your app drawer. Select the **Barry account**. You will be presented with the Go.Barry homepage and resources.
